WURTH & SURFPREP PARTNERSHIP

VALUED CUSTOMER RELATIONSHIP

Wurth Wood Group and Dixon Abrasives have been developing a solid partnership for more than 5 years now. Both companies strive to bring the latest products and technology to the forefront. The goal for both companies is to support our customers before, during, and after the sale. Since you have committed your trust to us in the form of purchases, we will commit ourselves to making sure you are satisfied with those purchases as well as the service and customer support proposition from Wurth Wood Group and Dixon Abrasives. Our combined partnership is on display in this catalog and we have developed a new **Partner Perk** program to bring additional value to you in labor cost and time savings as well as discounted products.

What is the Partner Perk program? For our valued customer's, we are now offering **Perk Pricing** on sanding equipment as well as quantity break discounts on Dixon Abrasives. Our mission is to become trusted advisors in all aspects of the finish process and throughout your fabrication process – from coatings, to equipment, to shop supplies, accessories and now abrasives and state of the art sanding systems from Dixon Abrasives .

For your valued loyalty we would like to give back in the form of some great discounts. You will find a special “**Perk Price**” listed next to certain items in this catalog. We have partnered with Dixon abrasives to develop a buying program that allows us to discount the sanders and several abrasives options and then pass that cost savings along to you.

The **Perk Pricing** on Surfprep and Dixon abrasives products is available for all customers that are buying ML Campbell coatings and shop accessories or willing to explore Wurth Wood Group as an option for a broader range of products in general. We place a high value on this relationship and are very happy to be partnered with you, our customer. We hope that the knowledge and expertise we bring to your finish department brings added value and profitability to your business.

Thank you for your support and let's schedule a Surfprep demonstration so we can show you how to put this money making technology to work for you.

* Please contact your local Wurth Sales Representative or Lacquer Specialist for further details regarding live Surfprep demonstrations.

LED Inspection Light

The warm 5,500 to 6,000K light temperature is closer to daylight, which is better for color rendition. The perfectly smooth beam quality and low level illumination make defects 10X more visible. The lenses keep the light on the table and not in the eyes of the operator.

Dimmable

This dimmable LED light bar controls brightness and generates 3,500-4,500 lumens with flawless beam quality from each LED light. It covers the entire working surface with even, high intensity light. You can run 2 light bars in sequence at 60 total ways used per bar. Will operate 30,000 - 50,000 hours.

SOLID SURFACE SANDING MADE EASY

- Choose either an Electric or Trident Air SurfPrep Vacuum Sanding System.
- Begin sanding with the sander flat against the surface, then release the throttle lever once removed from the surface to prevent swirl marks.
- Sand in an East to West, North to South pattern, overlapping the previous stroke followed by clockwise rotational circles to ensure uniform finish.
- To ensure an optimal finish and a dust free environment, it is highly suggested a complete vacuum system is used.
- Uncollected dust creates an abrasive effect and will leave scratches, especially on darker surfaces.
- If necessary, clean between sanding steps with a microfiber towel.
- Install a SurfPrep LED Inspection Light (SPIL-24 or SPIL-40) to ensure uniform sanding across the surface.
