WURTH & C.A.TECH PARTNERSHIP

VALUED CUSTOMER RELATIONSHIP

Wurth and CA Technologies have been partners for more than 15 years. Both companies strive to bring the latest products and technology to the forefront. The goal for both companies is to support our customers before, during, and after the sale. Since you have committed your trust to us in the form of purchases, we will commit ourselves to making sure you are satisfied with those purchases. Our combined partnership is on display in this catalog and we have developed a new Partner Perk program to bring value to you.

What is the **Partner Perk** program? For our valued customer's, we are now offering perk pricing on spray equipment. Our mission is to become trusted advisors in all aspects of the finish process - from coatings, to equipment, to shop supplies and accessories.

For your valued loyalty we would like to give back in the form of some great discounts. You will find a special "**Perk Price**" listed next to certain items in this catalog. We have partnered with CA Technologies to develop a buying program that allows us to discount the higher priced items like guns and pumps, and then pass that cost savings along to you.

The perk pricing is available for all customers that are buying ML Campbell coatings and shop accessories like sandpaper and abrasives. We place a high value on this relationship and are very happy to be partnered with you, our customer.

*** Ask your Sales Representative about more information about Perk Pricing and to see if your company qualifies.**

We hope that the knowledge and expertise we bring to your finish department brings added value and profitability to your business. Thank you for your support and let's schedule a demonstration so we can show you how to put this money making technology to work.

Wurth / ML Campbell / CAT have partnered together to create a spray equipment set up guide. In it you will find the must-needed set up recommendations for all of the ML Campbell products. The equipment listed ranges from hand guns, to pressure pots, to Air Assist Airless pumps. With this easy to follow guide, you can immediately set up your equipment to achieve the best possible results from your ML Campbell products. A Wurth finish specialist is also trained to help assist you with your equipment set up.

The ML Campbell square foot coverage guide is a marketing brochure designed to show you the cost savings benefits of new equipment technology such as HVLP (High Volume Low Pressure) and Air Assist Airless. Turning spray equipment into real dollar savings is our goal so please ask your finish specialist to explain the many key features and benefits of an improved and updated spray equipment system.
